Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to
Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 5th September 1959

Application for Patents

The dates shown in crescent brackets are the dates
claimed under Section 78A of the Act.

20th August 1959

68799. Automatic Telephone and Electric Company Limited. Improvements in or relating to printed circuit cards. (3rd September 1958).
68800. H. Oetiker. Hose fixing device, particularly for fire extinguishing hoses.
68801. Preparation Industrielle Des Combustibles. Improvements relating to float and sink separating apparatus.
68802. United States Steel Corporation. Teeming nozzle valve for vacuum casting apparatus.
68803. Standard Telephones and Cables Limited. Improvements in or relating to electric signalling equipment. (12th January 1959).
68804. Standard Telephones and Cables Limited. Improvements in or relating to metal rectifier equipment. (10th February 1959).
68805. Daimler-Benz Aktiengesellschaft. Improvements relating to planetary change-speed gearing arrangements. (12th May 1959).
68806. Salzgitter Industriebau Gesellschaft mbH. Transport bucket for concrete, stones, and the like.
68807. Institut Francais Du Petrole, Des Carburants Et Lubrifiants. Improvements in or relating to the production of 4: 4-dimethyl-meta-dioxan. (30th July 1959). [Addition to No. 68977].
68808. Ciba Limited. Manufacture of injectable solutions
68809. Ciba Limited. Manufacture of diaza compounds.
68810. Ciba Limited. Manufacture of etherified hydroxyl compounds.
68811. Ciba Limited. Manufacture of polycyclic compounds.
68812. Ciba Limited. Manufacture of polynitrogen compounds.
68813. Ciba Limited. Manufacture of diazacyclic compounds.
68814. Ciba Limited. Process for preparation of cyclic nitrogen compounds and intermediates.
68815. Ciba Limited. Reduction process for preparation of cyclic nitrogen compounds.

68816. Ciba Limited. Process and intermediates for the preparation of cyclic nitrogen compounds.

21st August 1959

68817. Schering Aktiengesellschaft. 2-halogen- α -androstene-17-ol-3-ones and their 17-esters and a process for their manufacture.
68818. A. C. Padamsee. Improvements in or relating to screw-on stoppers for bottles and like containers.
68819. A. C. Padamsee. Improvements in or relating to vacuum flasks and the like.
68820. A. C. Padamsee. Double cup for containers.
68821. A. C. Padamsee. Improvements in or relating to containers vacuum flasks or the like.
68822. Metallurgical Processes Limited. Improvements in or relating to the recovery of zinc from zinc-containing materials. (21st August 1958).
68823. Dunlop Rubber Company Limited. Improvements relating to the valves of pneumatic tyre tubes and other inflatable articles. (22nd August 1958).
68824. Dunlop Rubber Company Limited. Improvements in pneumatic tyres. (28th August 1958).
68825. The Wellcome Foundation Limited. Piperazine compounds and their preparation.
68826. Merck & Co., Inc. 2, 3-dimethoxy-5-methyl-benzoquinones. (8th June 1959).
68827. Pilkington Brothers Limited. Improvements in or relating to the manufacture of glass. (22nd August 1958).

22nd August 1959

68828. Hercules Powder Company. Improvements in or relating to carbamates.
68829. Photoceramics Inc. Fired photographically decorated objects and their manufacture.
68830. K. M. Groetschel. Lagging iron couplings employing locking pins.
68831. K. M. Groetschel. A device for facilitating the fitting of lagging elements in the progressive lagging of mine galleries.
68832. Aktiebolaget Bofors. Fire-control instrument with hitting point computer consisting of an electronic digital computer for e.g. binary numbers.
68833. Simon-Carves Limited. Improvements in indicating or controlling devices. (15th September 1958).
68834. Minnesota Mining and Manufacturing Company. Developer.
68835. Union Carbide Corporation. Tear tapes and method therefor.

24th August 1959

68836. V. R. Keshavaraj. Improvements in or relating to packing of capsules and the like.
68837. C. K. R. Rao. A game called "plastik faces".
68838. A. C. Padamsee. A screw on stopper cum lip pourer for bottles and like containers.
68839. Inventa A. G. Fur Forschung Und Patentverwertung. Apparatus for the continuous counter-current treatment of solids in pourable form with liquids.
68840. Inventa A. G. Fur Forschung Und Patentverwertung. Process for the continuous drying of polyamide granulate.
68841. Inventa A. G. Fur Forschung Und Patentverwertung. Process for the extraction of constituents of low molecular weight from granulated poly-ε-caprolactam.
68842. Gesellschaft fur Linde's Eismaschinen Aktiengesellschaft. A process of and an apparatus for low temperature gas separation.
68843. "Shell" Research Limited. Method and lubricating compositions for metal rolling. (25th August 1958).
68844. The British Oxygen Company Limited. Electric and welding of generally horizontal seams. (28th August 1958).
68845. Ciba Limited. Process for the manufacture of 11 α 18-dihydroxy-progesterone.
68846. Watliff Company Limited, and W. E. Arnold. Improvements in or relating to commutators for dynamo-electric machines. (1st September 1958) [Addition to No. 55533].
68847. California Research Corporation. Well measurement.
68848. Siemens-Schuckertwerke Aktiengesellschaft. Surface treatment of semi-conductor elements.
68849. Fimag—Finsterwalder Maschinen GmbH. Arrangement for exciting and compounding synchronous machines.
- 25th August 1959
68850. T. C. Munirathnam. Improvements in or relating to power plants.
68851. Vereinigte Österreichische Eisen-Und Stahlwerke Aktiengesellschaft. A tensioning device, particularly for double chain scraper conveyors.
68852. R. R. Pardasani. Improvement in or relating to paper punching machine.
68853. Indo Japan Vacuum Bottle Co. (India) Private Ltd. Appliance for the fabrication by means of a rotary and expanding form the inner cyclinder of a double walled vacuum flask.
68854. Metal Containers (Installations) Limited. Container.
68855. Bataafse Petroleum Maatschappij N. V. Polymerization of conjugated dienes.
68856. Bataafse Petroleum Maatschappij N. V. New phosphorus compounds with insecticidal activity.
68857. The Singer Manufacturing Company. Two-speed drive for sewing machines.
68858. J. R. Geigy A.-G. Process for the optical brightening of acrylonitrile organic synthetic fibres, and material brightened thereby. (24th April 1959).
68859. American Cyanamid Company. Heterocyclic organic compounds and method of preparing same. (13th July 1959).
68860. Molybdenum Corporation of America. Improvements in iron and steel production.
68861. Siemens-Schuckertwerke Aktiengesellschaft. Production of semi-conductors devices.
68862. Merck & Co., Inc. 2 α, 16 α-di-lower alkyl steroids having anti-inflammatory activity. (25th September 1958).
68863. Merck & Co., Inc. 2, 3-dimethoxy-5-methylbenzoquinones and derivatives thereof. (6th November 1958).
68864. A. P. Saranin and C. J. Allan. An improved calandria vacuum pan. (27th August 1958).

68865. I. Erdely and M. Erdely. Prefabricated casing plate, and permanent or provisional casing for moulded walls built of prefabricated plates.

68866. Licencia Talalmanyokat Ertekessito Vallalat. Refractory compound bricks and methods of making the same.

68867. Aktiebolaget Industrikompaniet. Vibrator.

Alteration of Date

68285. Ante-dated to 25th February 1958, under Section 5 of the Act.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

62369. Bracker A. G. Method for renewing the stock of travellers in a device for bringing the travellers onto the rings of ring spinning and/or ring doubling frames. Accepted on 25th August 1959.

Travellers held together by a wrapping pushed onto the guide and the wrapping is entirely removed from the travellers when they are on the guide.

62370. Bracker A. G. Device for bringing stacked travellers onto the rings of ring spinning frames. Accepted on 25th August 1959.

Pressure-piece loaded with spring presses the travellers on a guide rail against a stop fixed on the tongue that separates the travellers from stack and presses them onto the rings.

62475. N. V. Organon. Process for the preparation of long-acting insulin preparations. Accepted on 25th August 1959.

Pressing solid insulin preparation and suspending resulting product in pulverized condition in aqueous liquid.

62576. Ali Ahmed Khan. Keyboards of typewriting and teleprinting machines and a typefont in bengali script. Accepted on 22nd August 1959.

Providing only a single character for every original alphabet, the total number of the alphabetical characters not exceeding 39 in number and said characters are cast on type faces so that no part of said characters projects beyond the edges of the type faces, every alphabetical character is cast within 70 per cent of the type faces and the rest 30 per cent space remaining blank.

62577. A. A. Khan. A typefont and typebody for printing in hindi script. Accepted on 21st August 1959.

Wherein alphabetical characters are cast within 70 per cent space of typefaces and rest 30 per cent space is cast blank.

62578. A. A. Khan. A typefont and typebody for printing in the naskh script. Accepted on 21st August 1959.

Wherein alphabetic characters are cast within 70 per cent space of typeface, lower dot characters are cast within 15 per cent space below said 70 per cent space while rest of 15 per cent space is left blank.

62585. Veb Entwicklungsbau Pirna. Improvements in heat exchangers of the regenerative rotary type for gas turbines. Accepted on 22nd August 1959.

Rotative ring shaped heat exchange body is revolving between crown pieces constructed as flat sealing bodies having deviation chambers and intake and outflow springs arranged, alternately to one another, which release from time to time only a cross section area of alleged size of heat exchange body.

63184. H. Mahle. Light metal piston for internal combustion engines. Accepted on 25th August 1959.

Distance from lowermost ring groove to about six times insert thickness is more than 2.7 p.c. of piston diameter but less than three insert thickness.

63176. Gluconate Limited. Process for the preparation of a sedative. Accepted on 18th August 1959.

Extracting plant roots with ethanol treating extract concentrate with benzene treating its extract concentrate with ether and to separate alkaloid by chromatography from ether extract.

63224. Parke, Davis & Company. Method for producing heterocyclic compounds. Accepted on 24th August 1959.

Reacting 2-thienyl alkali compound with N-cyclohexylidene amine under anhydrous conditions and the resulting product decomposed with water.

63225. Parke, Davis & Company. Process for producing 1-phenylcyclohexylamine and its acid addition salts. Accepted on 25th August 1959.

Treating 1-phenyl-cyclohexane carboxamide with alkali metal hypohalite and hydrolysing the product with mineral acid.

63228. Parke, Davis & Company. Process for producing 1-phenylcyclohexane compounds and acid addition salts thereof. Accepted on 21st August 1959.

1-phenyl cyclohexyl substituted amine is reacted with an aldehyde, ketone or an acylating agent, the product is reduced and the compound so produced is reacted, if desired, with an acid.

63230. United States Steel Corporation. Method and apparatus for vacuum casting. Accepted on 20th August 1959.

Placing a mold into a chamber which is evacuated delivering a stream of molten metal into the chamber the pressure in the chamber causing the stream to violently form into an expanding cone of fine droplets.

63231. Electric & Musical Industries Limited. Improvements relating to the automatic control of machine tools. (27th February 1957). Accepted on 25th August 1959.

Comprising reading means for deriving discrete signals from a record of such signals, a contour-control signal generator for deriving from groups of said discretion signals.

63235. Hickson & Welch Limited. Process for the production of new optical whitening agents, compositions containing the same and materials treated therewith. (1st March 1957). Accepted on 25th August 1959.

Oxidising an O-amino azo-dye obtained by coupling diazotised 4-amino-stilbene-2-sulphon-cyclohexylamide with 5-amino-acenaphthene sulphate.

63256. British Telecommunications Research Limited. Improvements in or relating to amplifiers employing transistors. (1st March 1957). Accepted on 21st August 1959.

Including a plurality of step down transformers connected by way of a multi-stage transistor amplifier forming unity-current-gain matching network.

63262. J. R. Geigy A.-G. Process for the production of L(-)- α -amino-caprolactam. Accepted on 25th August 1959.

Splitting precipitated salt of L(-)- α -amino-caprolactam with L(-)-pyrrolidone carboxylic acid, obtained by reacting said acid with D, L- α -amino caprolactam, with stronger acid.

63282. J. G. Kulkarni. Improvements in or relating to dropper bars for warp stop motions. Accepted on 24th August 1959.

Its outside bar is made by welding together two metal strips of zigzag section each of the strips having an upper part in a different plane from that of its lower part, the planes of these two parts being parallel to, but apart from, each other.

63306. D. B. Foster. Improvements in or relating to pre-fabricated buildings. Accepted on 25th August 1959.

Buildings characterised in that the external walls a ceiling are of double skin construction with the edges of two skins sealed to rectangular frame member.

63348. Union Carbide Corporation. System for delivering low-boiling, liquified gas material. Accepted on 24th August 1959.

Distributing gas material having low boiling point at atmospheric pressure, in liquified form to customer apparatus from which the material is dispensed as a gas.

63349. Hobourn-Eaton Manufacturing Company Limited. Dual fluid pump. (16th October 1957). Accepted on 24th August 1959.

A first fluid pump having inlet means and discharge means, a second fluid pump having inlet means and discharge means.

63351. I. E. S. Park. Improvements in or relating to the conveyance of freight by aircraft. Accepted on 22nd August 1959.

Members of air frame structure extend from adjacent to the openings in the compartment and parallel tracks in the bottom of the compartment for supporting a wheeled load carrying platform.

63373. Chas. Pfizer & Co., Inc. Preparation of tetracycline compounds. Accepted on 21st August 1959.

Treating 6-demethyl tetracycline or chloro-tetracycline with hydrogen in inert solvent and palladium catalyst.

63375. The British Oxygen Company Limited. Work supports. (29th March 1957). Accepted on 20th August 1959.

A support member for a load, rotatable mounting means associated with said member and means responsive to the weight of the load.

63376. Brevets Aero-Mecaniques S.A. Improvements in self destruction fuzes for projectiles rotating about their axes. (19th November 1957). Accepted on 25th August 1959.

Means interposed between the member, axially slidable in the fuze body, and the fuze body for transmitting to the member, the movement of rotation of the body about its axis.

63437. Chloride Batteries Limited. Improvements relating to tubular type plates for electric accumulators. (28th March 1957). Accepted on 20th August 1959.

In which the tubes are woven, knitted or braided of a yarn formed from a polyester resin of terephthalic acid and ethylene glycol.

63498. Director, Indian Institute of Science, Bangalore. A fluid measuring meter. Accepted on 24th August 1959.

Velocity of the fluid at inlet to bowl is adapted to be higher than velocity of water leaving the exit of bowl.

- 63665.** General Aniline & Film Corporation. Ester type surface agents. Accepted on 25th August 1959.

Reacting a hydroxylamine sulfonic acid with a mixed anhydride of boric acid and a fatty acid.

- 63727.** Imperial Chemical Industries Limited. Improvement in or relating to the production of synthetic elastomers. (1st May 1957). Accepted on 20th August 1959.

A diisocyanate and a mixture selected from the group consisting of polyesters, polyester-amides and polyethers, containing at least a compound which melts not below 160°C selected from the group of polyesters and polyester amides, are interacted and cured.

- 63814.** Montecatini Societa Generale Per L'Industria Mineraria E Chimica and K. Ziegler. Catalytic compositions for use in the polymerization of vinyl monomers, and process for preparing them. Accepted on 21st August 1959.

Said composition comprising an alkyl compound and a solid carrier material having absorbed thereon.

- 63863.** Dunlop Rubber Company Limited. Improvements in or relating to apparatus for the manufacture of pneumatic tyres. (1st May 1957). Accepted on 22nd August 1959.

Comprising a collapsible building drum, cylindrical supporting members located coaxially one at each end of the drum, an annular air bag carried on each member to support an end of tyre building fabric projecting beyond the end of the drum.

- 64129.** D. B. K. Mansell. Link connection for machinery belting. Accepted on 24th August 1959.

A link or like member having longitudinal members and transverse members mounted rotatably, shackle pass between longitudinal members round bearing members to belt end.

- 64245.** The Distillers Company Limited. Cobalamin producing fermentation process. (27th June 1957). Accepted on 21st August 1959.

Fermenting a liquid nutrient medium with a cobalamin producing species of the genus propionibacterium.

- 64349.** Lonza Electric and Chemical Works Limited. Process for the extrusion of tubular sheets of thermoplastic material. Accepted on 24th August 1959.

Extruding from an opening in form of tube into which inert gas is injecting to mix with vapours of volatile constituents evolved.

- 64615.** Pharmazeutische Fabrik Montavit Gesellschaft mit beschränkter Haftung. Process for the manufacture of stable solutions for use in inhalations. Accepted on 18th August 1959.

Comprising volatile oils, 2, 2-dialkyl-4-hydroxy-methyl-1, 3-dioxolane and glycerine.

- 64774.** Imperial Chemical Industries Limited. Improvements in or relating to the manufacture of resilient rollers for printing. (9th August 1957). Accepted on 22nd August 1959.

Coating central shaft with polymethane made of polyester with acid value below 3 mg KOH per gram and viscosity of 50 to 150 poises at 25°C.

- 64913.** The Distillers Company Limited. Continuous process for the production of cobalamins. (13th September 1957). [Addition to No. 64245]. Accepted on 21st August 1959.

Fermenting a liquid nutrient medium under aerobic conditions with a cobalamin producing species of the genus propionibacterium.

- 64975.** Farbenfabriken Bayer Aktiengesellschaft. Bistriazinylamino-stilbene compounds. (30th May 1958). Accepted on 21st August 1959.

4:4-diaminostilbene-2:2'-disulphonic acid is reacted with cyanuric chloride and the reaction product is then reacted with diethanolamine and methylamine.

- 65189.** Les Usines De Melle. Process for producing highly fine alcohol from an impure dilute aqueous solution thereof. Accepted on 24th August 1959.

Subjecting the impure dilute alcoholic solution to a first extractive distillation, removing the impurities and subjecting the purified alcoholic solution to a second extractive distillation.

- 65500.** Westinghouse Brake & Signal Company Limited. Improvements relating to plug valves, more especially for use in driver's brake valves of railway vehicle vacuum braking apparatus. (16th October 1957). Accepted on 20th August 1959.

Comprising a valve body with inlet and outlet ports opening into its interior, resilient seating washer bounding one port and a swivelling closure member having a face in the shape of spherical cap cooperating with seating washer and which derives its support in the manner of a canti-lever solely from a bearing or bearings disposed to one side only of the interior of the body.

- 65734.** Chloride Batteries Limited. Improvements relating to tubular type plates for electric accumulators. (21st November 1957). Accepted on 24th August 1959.

Made of a highly permeable fabric resistant to acid and oxidation which is stiffened by application of a chemically resistant bonding agent.

- 66062.** The British Thomson-Houston Company Limited. Improvements relating to protective covers for electric lamps. (16th December 1957). Accepted on 22nd August 1959.

Cover comprising a longitudinally split jacket of pliable mechanically strong material.

- 68285.** Parke, Davis & Company. Method for producing phenylcyclo-hexane compounds. [Divisional date 25th February 1958]. Accepted on 21st August 1959.

N=benzoylamino compound is reacted with an organometallic pentamethylene derivative, the product decomposed with water and the resulting compound, if desired, is reacted with an acid.

Patents Sealed

60240. 60506. 60937. 61742. 61754. 61797. 61805. 61885. 61911. 61929. 61930. 61958. 61997. 62085. 62136. 62142. 62253. 62254. 62400. 62403. 62527. 62600. 62706. 62713. 62763. 62767. 62846. 63015. 63138. 63259. 63330. 63413. 63636. 63674. 63696. 63887. 63993. 64156. 64267. 64395. 64480. 64539. 64552. 64571. 64661. 64695. 64814. 64891. 65167. 65306. 65699. 65700. 65760. 66548.

Amendment Proceedings

(1)

The amendment proposed by Fisons Pest Control Limited in respect of Patent Application No. 59632 as advertised in the Gazette of India Part III, Section 2 dated the 16th May 1959 has been allowed.

(2)

The amendment proposed by Alfred Johann Buchi in respect of Patent Application No. 64445 as advertised in the Gazette of India Part III, Section 2 dated the 16th May 1959 has been allowed.

Registration of Assignments, Licences, Etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interests:—
